

Events on Monday 15th June

All Clinicians, staff and allied health care professionals wish to thank patients and visitors for their understanding and patience on Monday 15th June.

We had major problems with the electricity supply, which, unfortunately resulted in us only providing a very minimal service. Due to health and safety concerns, we could not allow the public to enter the building.

Scottishpower Manweb assure us that it was due to damage caused to old/worn out cabling being affected by weather conditions.

The problems did not only affect us, other businesses in the town were also disadvantaged.

All three surgeries and the community services, and allied healthcare services are now fully operational again.
